Accidental Species:

Although 221 species have been reported at the Orlando Wetlands park in the past five years, some of these are not regularly seen. This grouping includes wanderers, solitary predators, nocturnal or secretive species, shorebirds whose presence has diminished with the rising water level, and residents of the surrounding area whose habitat requirements are not completely met within the confines of the park.

Birding at Orlando Wetlands Park

Since its opening in 1987, Orlando Wetlands Park has attracted birds and birders. Its wetlands provide food and cover for over 150 avian species. Hikers and bicyclists can enjoy over 18 miles of berm roads with excellent views of wading birds and waterfowl. The un-intercepted skies provide aerial views of numerous raptor species. The mixed wood, understory, and ground cover of the perimeter of the park contain permanent residents and migratory passerines.

Location: Drive 40 minutes East of downtown Orlando on SR 50 to Christmas, FL. Go North (left) 2.3 miles on Ft. Christmas Road (CR 420), and 1.5 miles East (right) on Wheeler Road. Parking area will be on your left.
