7.1 Key Elements

The general intent of the Guidelines for the Village Center General Area is to encourage the development of a vital, pedestrian-oriented district that can support a variety of residential, retail, commercial and entertainment uses.

The key elements proposed in the Village Center General Area include the following:

Mix of Uses
Street-oriented retail and restaurants with professional office and apartments above will face commercial streets. Attached housing will range in density and unit type per block. Full-block attached housing projects of similar scale and expression are discouraged, except along park edges. Various projects per block introducing architectural variation are strongly encouraged.

Public Spaces
The Village Center General area includes a large public open space at the termination of Corrine Drive. The Village Center General area also fronts Lake Baldwin, Lake Susannah, and the greenbelt (resource-based park).

Urban Design Character
All buildings and entrances should be oriented to the street frontage to reinforce the pedestrian-oriented character. All buildings will build to a build-to line.

Pedestrian Connections
Key pedestrian paths shall be located along waterfront edges and parkways.

Transportation
The transportation system shall be based on the coordination and confluence of all modes of transportation, i.e. walking, bicycling, automotive, bus and shuttle bus, to occur in the Village Center.

Refer to Appendix A-G for further regulations and requirements.

7.2 Development Block

- Block size will generally range between 300'x300' to 400'x400'
- Block size may be larger than Village Center Core blocks in order to accommodate existing buildings and parking lots.
7.3 Development Standards

**Lot/Building Site Sizes**
- development block should be divided into smaller building sites, whenever possible
- max width: building site can extend up to full block, but to the greatest extent possible, single buildings should not exceed 200 feet.

**Lot Coverage**
- max impervious surface area: 85%
- parking lots must comply with landscape standards in Appendix G

**Setbacks**
- 6' to 12' front setback/build-to line
  - 0' minimum side setback
  - 3' minimum rear setback
- 20' minimum building separation required between attached housing buildings or after every 8 townhouse units
- 5' minimum setback from the street R.O.W. for all parking lots
- 20' minimum setback from the Planned Development site boundary required for principal structures

**Encroachment**
- balconies, awnings, covered entries, arcades, stoops, porches, roof overhangs may encroach upon setback area

**Frontage**
- a minimum of 75% of block width on street types VC-5, VC-6, and Res-1 must be building frontage
- a minimum of 80% of all buildings on a block facing street types VC-5, VC-6, and Res-1 should conform to the build-to line
- all buildings shall have their principal pedestrian entrance facing the street
- free-standing pergolas, arcades walls or hedges may substitute building frontage.
- parking lots shall not be adjacent to waterfront frontages
- parking lots must be screened from streets with a 2’ to 4’ high wall or hedge

**Building Height**
- a variety of building heights can occur within a block
- max height: 5 stories
- min height: 2 stories
7.4 Architectural Standards

- For commercial uses, the ground floor elevation shall include an appropriate amount of transparency to engage the public realm. The particular amount shall be determined in the neighborhood planning process based on the particular design of the street frontage.
- Drive-thru facilities are prohibited for all eating and drinking establishments.
- Drive-thru facilities will be limited to bank and savings institution use. These may only be located at the rear of a building, in a parking lot or in a parking garage. Drive-throughs may only be accessed via service streets, parking lots or parking garages.
- Refer to appendices A-F for further guidelines

7.5 Landscape Standards

- Refer to Appendix G

THE VILLAGE CENTER GENERAL AREA
DEVELOPMENT STANDARDS

7.8 Parking

- Minimum or maximum parking requirements will not be established, however every attempt should be made in the development of the Village Center General Area to minimize the size of surface parking areas.

- Tandem parking is allowed.

- On-street parking may be used to meet parking requirements.

- On-street parking will occur on all commercial streets in the Village Center General Area.

- Parking lots shall be developed behind buildings to the greatest extent possible.

- Parking lots shall be accessed from service streets to the greatest extent possible.

- Shared parking lots, easily accessible from service streets may occur.

- Shared parking-decks, accessible from the service streets of the Village Center General Area, are also permissible.

- Exterior wall materials for parking-decks should be compatible with the exterior wall materials utilized for adjacent buildings.

- Street frontages for parking-decks should incorporate either liner buildings or landscaping, including trees and shrubbery, to create a soft planting edge compatible with the adjoining street landscape.
