HIGH INJURY NETWORK

VISION ZERO ORLANDO

As part of the FORWARD Project, the city is updating the Vision Zero Action Plan and the **High Injury Network (HIN)**. The HIN identifies a cluster of where the most severe traffic crashes occur (fatalities or serious injuries) through a detailed analysis of crash data involving pedestrians, bicyclists, motorcyclists, and vehicles.

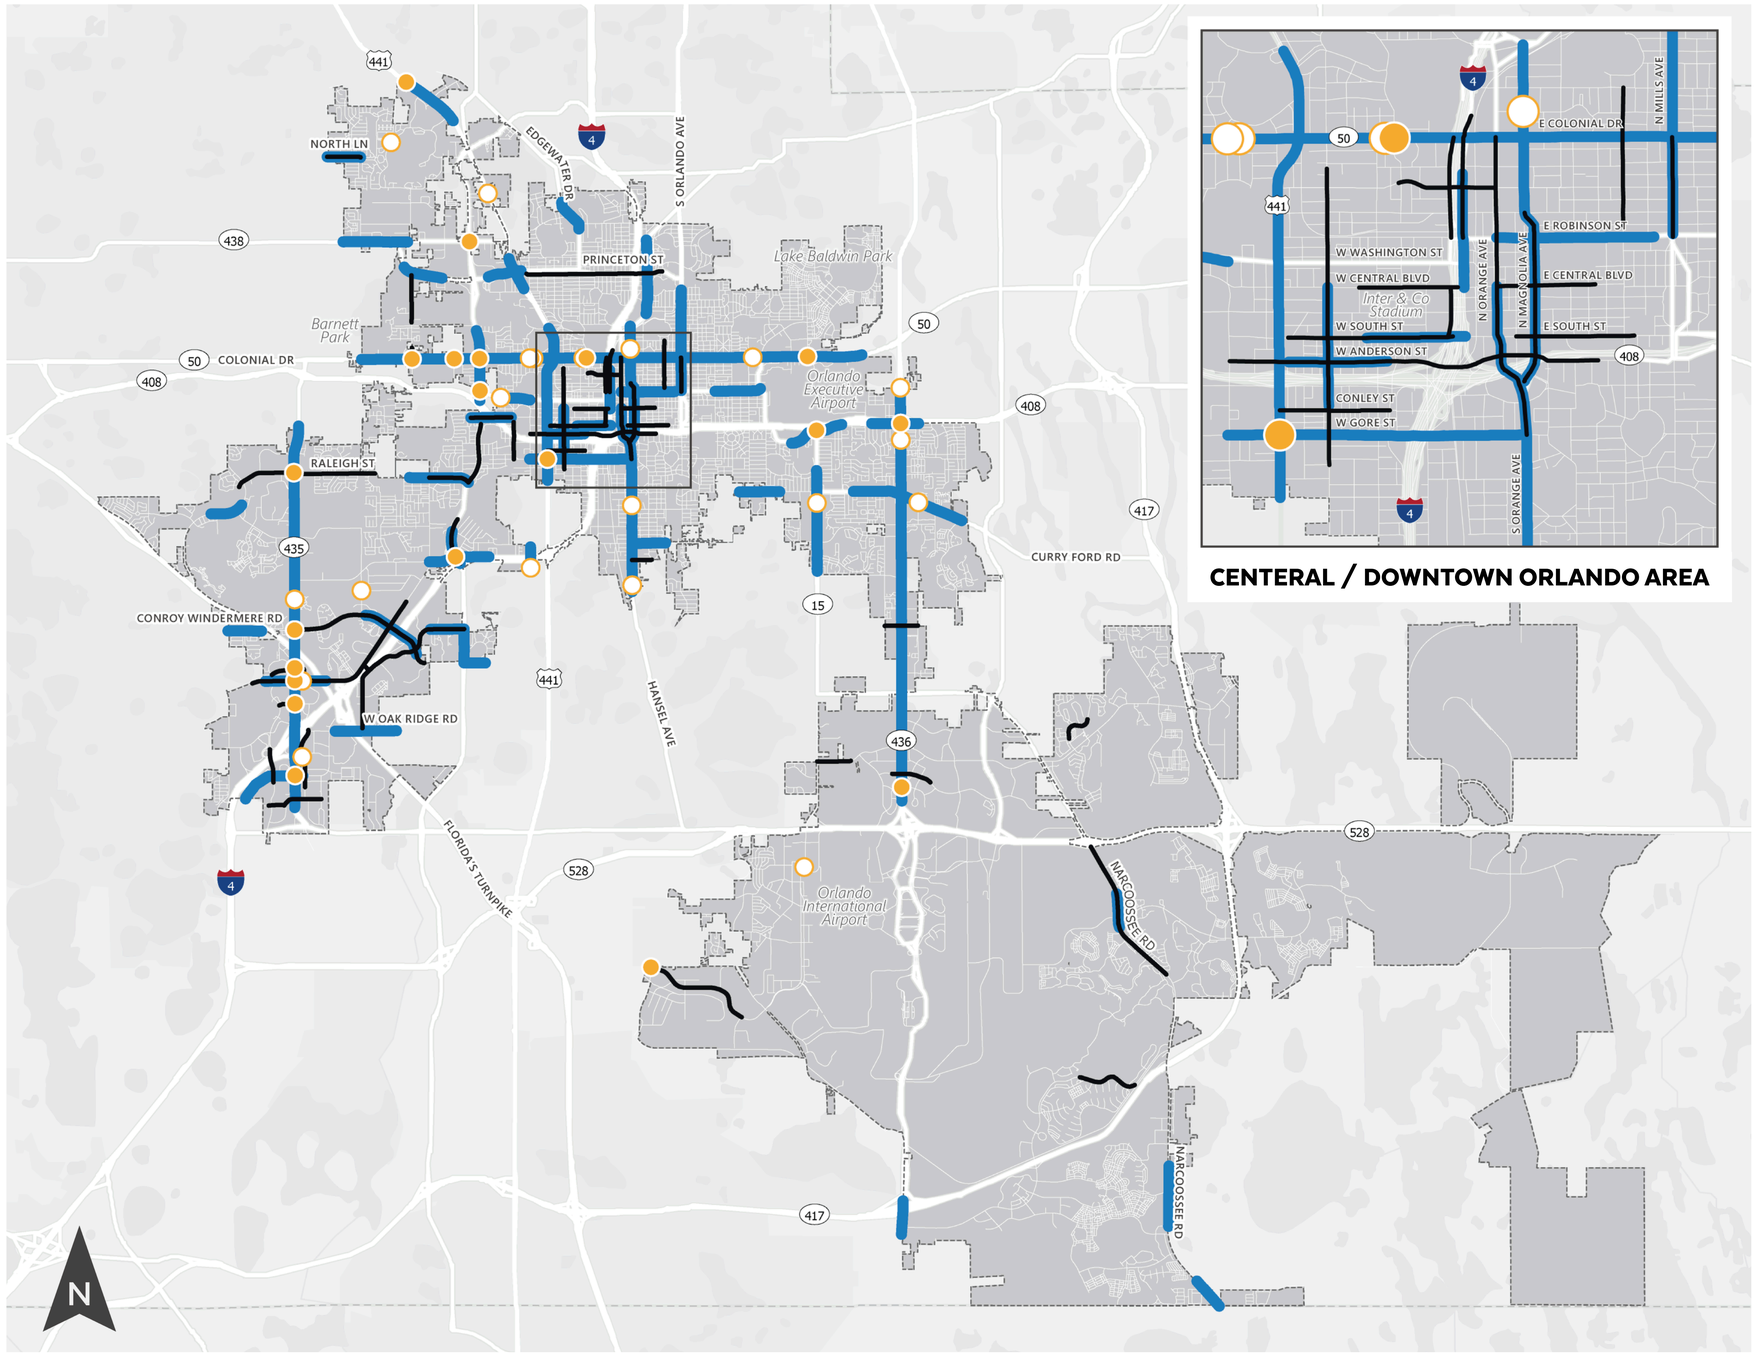

The HIN enables the city to strategically prioritize **safety improvements and allocate resources where they will have the greatest impact.**
