5. FORMS AND APPENDICES

1. PURPOSE

This directive provides procedures for the use of CJIS as FDLE has adopted the CJIS Security Policy as the standard for protecting Florida's Criminal Justice Information (CJI). The FDLE User Agreement mandates that agencies with FCIC and/or CJNet access comply with the CJIS Security Policy.

2. POLICY

This policy establishes guidelines for adhering to Federal Bureau of Investigation (FBI) Criminal Justice Information Services (CJIS) Security Policy 5.9 and provides guidance for the creation, viewing, modification, transmission, dissemination, storage, and destruction of Criminal Justice Information (CJI) data, to protect the CJI from unauthorized disclosure, alteration, or misuse.

3. DEFINITIONS

Criminal History Record Information (CHRI)- CHRI is a subset of CJI and includes any notations or other written or electronic evidence of an arrest, detention, complaint, indictment, information, or other formal criminal charge relating to an identifiable person that includes identifying information regarding the individual as well as the disposition of any charges. This includes Computerized Criminal Histories (CCH).

Criminal History information is sensitive and should be treated as such. These records are disseminated only as a part of the user's criminal justice duties on a need-to-know, right-to-know basis. Voice transmission of a criminal history should be limited, and details of a criminal history should be given over a radio or cell phone only when an officer's safety is in danger, or the officer determines that there is a danger to the public.

The following files shall be protected as CHRI:

1. Gang File
2. Known or Appropriately Suspected Terrorist File
3. Convicted Persons on Supervised Release File
4. Immigration Violator File (formerly the Deported Felon File)
5. National Sex Offender Registry File
6. Historical Protection Order File of the NCIC
7. Identity Theft File

The remaining NCIC files are considered "hot files."

Improper access, use or dissemination of CHRI and Hot File information is serious and may result in administrative sanctions including, but not limited to, termination of services and State and Federal criminal penalties.

Criminal Justice Information (CJI)-The term used to refer to all CJIS-provided data, either from the FBI or FDLE, necessary for law enforcement agencies to perform their missions and enforce the laws, including, but not limited to, biometric, identity history, biographic, property, and case/incident history data. CJIS FCIC/NCIC data is provided to criminal justice agencies and statutorily defined agencies for official criminal justice purposes. The term "criminal justice purpose" is defined in section [943.045\(2\)](#), Florida Statutes, and 28 Code of Federal Regulations (CFR) Part 20.3 as follows: "Administration of criminal justice means performing functions of detection, apprehension, detention, pretrial release, post-trial release, prosecution, adjudication, correctional supervision, or rehabilitation of accused persons or criminal offenders by governmental agencies. The administration of criminal justice includes criminal identification activities and the collection, processing, storage, and dissemination of criminal justice information by governmental agencies." FDLE has adopted the FBI CJIS Security Policy as the foundation for FCIC, CJNet, Interstate Identification Index (III) and Computerized Criminal History (CCH) records related to information security. FCIC/NCIC data is any data obtained through a query to the FCIC message switch or other systems accessed via the CJNet (excluding

DAVID), containing FCIC/NCIC Hot Files, Florida CCH and/or III/CCH information from other states and/or the FBI. Any information from an FBI system (NCIC, III, N-DEX) or FCIC or Florida criminal history record shall be considered CJI.

Criminal Justice Information Services (CJIS)-Programs within both the Florida Department of Law Enforcement (FDLE) and the Federal Bureau of Investigation (FBI) responsible for the collection, warehousing, and timely dissemination of relevant Criminal Justice Information to qualified law enforcement, criminal justice, civilian, academic, employment, and licensing agencies.

CJIS Agency Coordinator (CAC)-The CAC is responsible for ensuring agency and use compliance with CJIS policies and procedures as they relate to FCIC and NCIC. The CAC is designated by the Chief of Police and serves as the point of contact for matters relating to CJIS information access.

Criminal Justice Network (CJNET)- A secure, private, statewide intranet system managed and maintained by the Florida Department of Law Enforcement (FDLE) to connect Florida criminal justice agencies to various data sources provided by the criminal justice community, such as secure email accounts, training manuals and announcements, memos, policy and procedure manuals, links to intelligence databases, links to State and local information systems, etc.

Florida Crime Information Center (FCIC)-The State of Florida's centralized database for tracking crime-related information, which can be queried by appropriate Federal, State, and local law enforcement and other criminal justice agencies.

Local Agency Security Officer (LASO)- The LASO ensures compliance with the FBI-CJIS Security Policy and any other applicable security requirements. LASOs should have technical knowledge of the department's network or be able to confirm information through local technical support. The LASO actively represents his or her agency in all matters pertaining to Information Security, disseminates Information Security alerts and other material to his or her constituents, and maintains Information Security documentation, including system and network configuration. The City's Information Security & Compliance Manager shall serve as the LASO.

National Crime Information Center (NCIC)-The national centralized database for tracking crime-related information, which can be queried by appropriate Federal, State, and local law enforcement and other criminal justice agencies.

Personally Identifiable Information (PII)- PII is information that can be used to distinguish or trace an individual's identity, such as name, social security number, or biometric records, alone or when combined with other personal or identifying information that is linked or linkable to a specific individual, such as date and place of birth, or mother's maiden name. Any CJIS-provided data maintained by an agency, including but not limited to, education, financial transactions, medical history, and criminal or employment history may include PII. A criminal history record, for example, inherently contains PII as would an N-DEX case file. PII shall be extracted from CJI for the purpose of official business only. PII must be protected as required by current State and local statutes. There is no requirement associated with PII and secondary dissemination. PII derived from CJI should be used only for official purposes.

Personally Owned Information Systems- Any bring-your-own devices (BYOD) including cellular telephones, smartphones, smartwatches, tablets and "air cards" are examples of cellular hand-held devices or devices that employ cellular technology. Additionally, cellular hand-held devices typically include Bluetooth, infrared, and other wireless protocols capable of joining infrastructure networks or creating dynamic ad hoc networks.

A personally owned information system shall not be authorized to access, process, store, or transmit CJI unless the agency has established and documented the specific terms and conditions for personally owned information system usage.

4. PROCEDURES

4.1 USER AGREEMENT

The User Agreement between an agency and FDLE/FBI is a legally binding document that covers liability issues and outlines what is expected of the agency regarding proper use of FCIC/NCIC systems from that day forward. Whenever the agency head changes, the Police Legal Advisor shall prepare and submit an updated User Agreement to FDLE. The Police Legal Advisor's office shall be the central repository for these user agreements.

The agency CAC should be familiar with the contents of the agency's CJIS-related User Agreements. The CAC is responsible for notifying and ensuring that all agency users implement new CJIS procedures and capabilities when they are made available.

4.2 RELATED POLICIES

The following policies contain more detailed information on CJI:

- OPD P&P 1115, Lost or Missing Persons
- OPD P&P 1122, Police Radio Communications
- OPD P&P 1125, Report and Recovered Stolen Vehicles
- OPD P&P 1202, Filing Criminal Cases
- OPD P&P 1604, Discipline
- OPD P&P 1625, Use of Electronic Communications Systems
- OPD P&P 2301, Disposal of Sensitive Documents
- RM 600-5, Security of Criminal History Data
- City Policy 808.20, Disciplinary Action

4.3 NETWORK SECURITY

The Office of the Chief Information Officer (CIO) is responsible for maintaining the secure architecture. The FBI CJIS Security policy requires that FCIC/NCIC be encrypted to 128 bits when transmitted over a public network segment. FDLE encrypts FCIC/NCIC from the message switch to the edge routers at each agency. The City of Orlando Technology Management (or Information Technology) Division maintains a secure network architecture ensuring that all CJIS information is encrypted in transit over segments of the internal network not exclusively dedicated to Orlando Police purposes. The LASO shall maintain an up-to-date network diagram for review and audit purposes. All computers accessing FCIC/NCIC or the CJNet must have virus protection software installed and regularly updated.

4.4. FDLE CERTIFICATION REQUIREMENTS

Criminal Justice Information Services (CJIS) Security and Privacy Training

Role-based security and privacy training shall be required for all personnel who have access to Criminal Justice Information (CJI) to include personnel with unescorted access to CJIS physically secure location. Training must be completed before access is granted to agency CJI systems or information and prior to performing assigned duties. Training must be completed on an annual basis.

There are four levels of Role-based Security and Privacy Training:

- Role 1: Basic User- all individuals with unescorted access to a CJIS physically secure location
- Role 2: General User- a user who is authorized to use an information system
- Role 3: Privileged User- a user that is authorized to perform security-relevant functions that general users are not authorized to perform
- Role 4: Users with Security Responsibilities

NOTE: For individuals who require Limited Access and Full Access Certification, the Role-based General User Training will be provided as part of the FCIC/NCIC Certification training and will require recertification on an annual basis.

Full Access (FA) Certification

This level of Certification is for those users who will be making queries, entries, managing record entries and conducting validations in the FCIC/NCIC system.

1. Online Training in nexTEST
 - a. New FA Users must complete Limited Access Online Certification module
 - b. New FA Users must complete Full Access Online module
 - c. Successfully pass a comprehensive (50) question online exam, with a passing score of 80% or higher, within fourteen (14) days of completing both online modules
 - d. User will automatically receive six (6) months of Temporary Full Access to FCIC/NCIC
 - e. A user that does not complete the Temporary Full Access exam within 14 days of completing the online training must view both training modules again
2. Classroom Instruction
 - a. New FA Users must participate in a Full Access Classroom instruction prior to the end of the six (6) months of Temporary Full Access
 - b. Successfully pass a twenty-five (25) question online exam, with a passing score of 80% or higher, within fourteen (14) days of classroom instruction
 - c. User will receive one (1) year of Full Access Certification
 - d. A user that does not complete the Full Access Classroom exam within 14 days of completing the classroom training must attend the classroom training again

Full Access Re-Certification Procedures:

Following the one-year expiration cycle, and current user participation in the online and classroom instruction, future re-certification shall be performed online as follows:

- a. User must view the Limited and Full Access Online training modules available on nexTEST
- b. User will have 14 days from the date of completing both online training modules to take the Full Access recertification online exam
- c. User must make an 80% or better to pass the cumulative 50 question exam. Upon passing the exam the user will be give one (1) year of Full Access certification

Full Access Expiration Procedure:

If a user allows his or her Full Access certification to expire, access to the system is immediately denied. To regain access the user must:

- a. Complete the Limited Access Online Certification module
- b. Compete the Full Access Online module
- c. Successfully pass a comprehension fifty (50) question online exam, with a passing score of 80% or higher

Full Access Failure Procedure:

1. **Online training Failure:**
 - a. User is locked out of FCIC/NCIC

- b. Upon failure of the modular training exam a user must go back through both the Limited Access and Full Access online training. Upon completion of re-training, the user must contact their CJIS Agency Coordinator (CAC)/ nexTEST administrator who will request the regional IDT Member or Customer Support Center (CSC) to unlock the user in nexTEST so the user may retest.
- c. Each failure will cause the user to complete the above process. A user will have three opportunities to pass the exam. The third failure will result in a user's inability to be certified as a Full Access operator for a period of one (1) year.

2. **Classroom training Failure:**

- a. User that fails the Full Access Classroom exam must retake and complete the Full Access Classroom training prior to retesting.
- b. After completing the Full Access Classroom training the user must contact the CJIS Agency Coordinator to unlock the user's exam in nexTEST

If a user fails to attend the Full Access classroom training prior to the 6-month Temporary Full Access expiration date, the user will be denied access and must contact the CJIS Agency Coordinator

Limited Access Certification:

This level of Certification is for users whose job function requires queries of the Florida Crime Information Center (FCIC) and the National Crime Information Center (NCIC). The purpose of Limited Access training is to provide users an essential understanding of the information and files contained within FCIC/NCIC, and describe key polices and procedures related to criminal justice systems.

- a. User must view the Limited Access online training module available on nexTEST
- b. User will have 14 days from the date of completing the online training module to take the Limited Access online exam
- c. User must pass the 25-question exam with a score of 80% or higher
- d. Upon passing the exam the user will be given 1 (one) year of Limited Access Certification
- e. A user that does not complete the Limited Access exam within 14 days of completing the online training must view the training module again prior to retesting

Limited Access Training Failure:

- a. If you fail the exam, you will not be shown the correct answers and are required to view the online training again and retest.
- b. Upon completion of re-training contact your CAC or nexTEST administrator who will verify the retraining has been completed and then will contact FDLE CJIS to unlock the test.
- c. After the test has been unlocked and then you will be able to retest.
- d. If you fail the exam three times in a one-year period, you will not be allowed to re-train and test for one year from the last failed attempt. Additionally, you will be denied access to FCIC/NCIC.

OPD volunteers, vendors, or contract services employees who work in or visit areas where CJIS is accessible must complete CJIS Online Security Certification (available in Spanish) and maintain Security Certification. This group of individuals does not have the capability to query FCIC/NCIC transactions.

All OPD personnel, Information Technology employees, or OPD volunteers and vendors who have physical or logical access to OPD computer networks with the ability to query FCIC/NCIC transactions must maintain Limited Access CJIS certification at all times. Information Technology personnel are also required to maintain CJIS Security and Privacy: Privileged Role training.

If a user lets their certification lapse, regardless of assignment, they shall not access or view CJIS data nor contact Teletype or another certified user to query CJIS information for them, as the user with the expired certificate would not be authorized to receive CJIS information. Users will receive reminders from FCIC about their certification expiring beginning 90 days prior to their expiration date. When a user sees this expiration notice, the certification exam should be taken as soon as possible. Users who allow their certification to remain expired for two years or more will be required to attend classroom training.

FDLE will notify the agency CAC of expiring CJIS certifications.

All users requiring certification shall contact the agency CAC to arrange for the proper training.

4.5 eAGENT

eAgent 2.0 is a web application maintained by FDLE that allows authorized personnel to make entries, inquiries, run reports and to transmit CJIS data that are in the Florida Crime Information Center (FCIC)/National Crime Information Center (NCIC) systems based upon their authority. It is fully compliant with NCIC 2000 and NLETS.

4.5.1 AUTHORIZED eAGENT USERS

This web application is compatible with most modern operating systems and web-browsers, including mobile devices, and will not require an installation. Users who are full access or limited access certified and have CJNET access may request to have an eAgent account to fulfill the law enforcement functions of that position.

4.5.2 PROCEDURE FOR REQUESTING eAgent

Any qualified employee who would like to have an eAgent account shall contact the CAC. If a user is logging into the application for the first time, they must complete the training via CJNET and then contact their agency's CAC to receive their login credentials.

4.5.3 PROCEDURE FOR ADDING/TRANSFERRING/REMOVING eAgent

The agency CAC shall maintain a current listing of all eAgent users. The CAC will assign the user to a Team and/or Personal Inbox depending on the need of the user.

4.5.3.1 eAgent EXCEPTIONS

Authorized eAgent users with a mobile computer (for example, a Criminal Investigations Division detective) shall not, under any circumstances, take their assigned mobile computer with them when transferred to Patrol, Downtown Bikes, or any other work unit where the computer will not be docked in a desktop docking station 80% of the time. At no time shall a mobile computer with eAgent on it be utilized in a patrol vehicle. Any user found to be violating this directive shall face disciplinary action, as this violates the agency User Agreement and could jeopardize the Agency's access to CJIS data.

4.5.4 REQUESTING INFORMATION FROM eAgent

The Attention (ATN) field must contain the employee identification number of the person requesting the CJIS data.

The Control (CTL) field must contain the employee identification number of the operation or employee submitting the CJIS data query.

4.6 ELVIS

The Electronic License and Vehicle Information System (ELVIS) is a web-based query-only application requiring either Full or Limited Access CJIS certification and/or CJIS Online Security certification.

4.6.1 AUTHORIZED ELVIS USERS

Authorized users must have either Full or Limited Access CJIS certification and/or CJIS Online Security

certification, which shall be verified prior to the activation of an account. Users must attend an ELVIS training session scheduled and presented by an authorized ELVIS administrator. The Agency ELVIS administrator shall maintain a list of all active ELVIS accounts.

4.6.2 PROCEDURE FOR ACTIVATING ELVIS ACCOUNT

Once an employee has successfully completed the authorized user requirements, an account will be created, and the authorized user will be notified by e-mail with the account activation instructions. The instructions will include the two-factor authentication requirements which include a username and password along with the "Grid Card". The "Grid Card" will be issued during account activation and the user will need to download and retain to access their account.

4.6.3 REQUESTING CJIS INFORMATION FROM ELVIS

All information accessed via ELVIS is permanently recorded and shall only be used for legitimate law enforcement purposes. When searching any CJIS related data via ELVIS the authorized user must complete all required fields. The "Attention" field shall be your employee number or the employee number for whom the information is being requested, and the "Reason" field shall be the case/incident number specific to the incident for which the query is being conducted.

4.6.4 PUBLIC NOTES AND COMMENTS

ELVIS allows for the addition of comments and public notes, following the return of a driver license or vehicle registration check. Authorized users can add a comment for later reference that will only be visible to that authorized user. An authorized user may also elect to add a public note which can be viewed by any ELVIS user that also runs a check on the same driver license or vehicle registration. Both comments and public notes shall only contain factual information that enhances officer safety and/or assists with a lawful investigation.

4.6.5 HIT CONFIRMATIONS

When an FCIC, NCIC, or local hit is received via mobile computer, confirmation will be obtained from Teletype via radio or telephone. Verification of any actionable CJIS related criminal history or CCW information will be obtained from Teletype via radio or telephone.

4.7 EMAIL

Emailing CJIS-related material is prohibited as the City's email system does not currently meet CJIS Encryption standards. (FBI Security Policy Encryption shall be a minimum of 128 bit.) Additionally, employees shall adhere to the procedures outlined in the current issue of City P&P 754.11, E-mail.

4.8 DATA STORAGE

UNIVERSAL SERIAL BUS (USB) DEVICES (FLASH/THUMB /EXTERNAL DRIVES)

CJIS Data is prohibited from being stored on either City or personal USB devices.

PRINTERS

A printer is defined as an electronic device capable of buffering the information only long enough to print. Information is not stored long-term on this machine. CJIS data is prohibited from being printed on devices outside the Orlando Police Department.

MULTI-FUNCTIONAL DEVICES

A multi-functional device is a copier, printer, scanner and/or fax machine capable of storing information long-term. The disposal process for this machine should be treated the same as if it were a computer. CJIS data is prohibited from being printed on multi-functional devices outside the Orlando Police Department.

CLOUD CJIS FCIC/NCIC

Employees are prohibited from transmitting or storing data on any Cloud solution without the approval of the City Local Agency Security Officer (LASO). Cloud solutions include Google apps (email, Google Docs, Google Sites), Facebook,

etc. (see Appendix A), as those solutions do not currently meet CJIS encryption standards.

4.9 FAXING

Faxing CJIS-related material is prohibited without first being authorized by the Department's CAC.

4.9.1 TRANSMITTING CRIMINAL HISTORIES VIA FACSIMILE (FAX) MACHINE

Teletype operators shall not routinely transmit via facsimile (fax) machine any criminal history data obtained from FCIC/NCIC. Unless when there is an immediate need to further an investigation or there is a situation affecting the safety of the officer or the general public. Histories may be transmitted by facsimile upon approval of the agency CAC fax machine location and potential access from non-CJIS-certified personnel or the public is the determining factor for approval. Per FDLE, histories may be faxed to any location with an ORI. Histories may be faxed to all Orlando Police Department substations, including the Orlando International Airport, with an accompanying fax cover sheet. Officers receiving faxed histories must advise the Teletype operator that they have received the fax. This notification may be made via the radio or on the phone. When in doubt about faxing a history to a location, users shall contact the agency CAC. If the receiving party faxes the information to another agency with an ORI different from that of the Orlando Police Department, this dissemination must be recorded on OPD ONLINE CJIS logs, Secondary Dissemination.

4.10 LOGGING AND DISSEMINATION OF CJI

Users are required to log all Criminal Histories they run and/or information they disseminate to persons outside the ORI: FL0480400 assigned to the Orlando Police Department. Users may access the Criminal History Record Information Requests and the Secondary Dissemination logs from the CJIS logs link available on OPD Online. Users should contact the agency CAC with questions regarding the CJIS logs or if data entered needs to be amended or deleted.

LOGGING CRIMINAL HISTORY REQUESTS

Members will provide specific reasons for each inquiry (e.g., OPD case number or burglary investigation, expungement of record, private contractor, employment check, file maintenance, sex offender registration, etc.).

LOGGING SECONDARY DISSEMINATION

When the person requesting and/or in the possession of the criminal history shares any part of that information with another criminal justice professional outside of their agency, either *physically or verbally*, that action is considered secondary dissemination and must be recorded in the OPD Online CJIS logs located on the main page of OPD ONLINE or under the Admin/Logs.

The purpose of the Secondary Dissemination Log is to provide an audit trail and list all persons having direct access to the criminal history record. This log must be maintained at the agency for at least four years for audit purposes. The following information shall be annotated in the log: date and time of request; name of subject whose history was run; SID # or FBI # of subject; name of employee or person requesting the criminal history; the agency to which the information was released; employee number of operator making the query; the reason the information was disseminated; the purpose code; case number (if applicable); and any additional notes. Records of Criminal History queries and dissemination will be requested by both the FBI and FDLE during triennial (every three years) agency audits. All case packages transmitted to the State Attorney's Office that include a criminal history require an entry in the secondary dissemination log. Periodic internal agency audits may be conducted to ensure compliance with the above-referenced policy.

DISSEMINATION OF COMPUTERIZED CRIMINAL HISTORY (CCH) WITH AFFIDAVIT OF PROSECUTIVE SUMMARY (APS)

When submitting an APS that requires a criminal history to be run and included with the APS package, the officer writing the APS shall run and log the Criminal History in the Secondary Dissemination Log in the CJIS logs link available on OPD Online, noting that it will be disseminated to the State Attorney's Office (OPD Policy 1202, Filing

Criminal Cases).

PUBLIC RECORD REQUEST

Public Record requests for Teletype transactions or information obtained from the FCIC shall not be made available to non-criminal justice agencies or private individuals unless specifically authorized by statute. Information derived from the FCIC, including criminal history information, shall not be made available under Florida's Public Record Law (F.S. 119). Requests for FCIC information from non-criminal justice agencies, or individuals, must be made directly to the Florida Department of Law Enforcement. Information on filing a public records request can be found at www.fdle.state.fl.us.

4.11 DISPOSAL

DISPOSAL OF HARDCOPY CRIMINAL HISTORIES

Criminal history data is constantly changing and should be kept only until a case file is closed or the record is superseded, obsolete, or the administrative value is lost. Criminal histories should not be retained in case files: if a history is needed at a later time, a new history should be obtained. Criminal histories in the box in Teletype should be sorted through on a nightly basis. All criminal histories that have been held for ten days should be shredded. When destroying a criminal history record, agencies are required to dispose of it in a secure manner by shredding or burning the document(s). It is not to be discarded in the trash. Agencies shall ensure the disposal or destruction is witnessed or carried out by authorized personnel. Documents that have not lost their value and are still being kept for investigative purposes must be kept in a manner to prevent unauthorized or unintended access.

DISPOSAL/DESTRUCTION OF ELECTRONIC MEDIA

Electronic media used to store FCIC/NCIC must be properly erased/sanitized/wiped prior to disposal (disposal includes reuse by or transfer to a non-criminal justice entity). Electronic media includes, but is not limited to, diskettes, tape cartridges, ribbons, CDs, DVDs, digital memory cards, external hard drives, hard drives from computers and USB flash drives. FDLE encourages physical destruction of storage media prior to disposal. If the media is not physically destroyed, it must be completely overwritten at least six times to prevent unauthorized access to the previously stored data. In situations where computers are moved **within** an agency from an FCIC user to a non-FCIC user, all FCIC-related files should be removed from the device prior to reallocation to the new users. Additionally, all hardware and storage media should be erased/sanitized/wiped prior to surplus or transfer within the criminal justice agency. Please reference OPD Policy 2301, Disposal of Sensitive Documents, for more details on this disposal procedure.

4.12 AUDITS

FLDE AUDITS

FDLE Auditors conduct triennial (every three years) audits in compliance with Florida Statute 943 on every agency with access to the CJNet and FCIC/NCIC. Audits consist of an on-site visit by the audit staff. At the discretion of the auditors, an on-site visit can be performed at an agency regardless of the entry/non-entry status of that agency. The objective of the audit is to verify adherence to CJIS policies and procedures.

During an on-site visit, FDLE auditors will use a questionnaire to evaluate entries in the system and a sample of these entries will be checked for accuracy and proper validation procedures. The auditor will also need to review any Interagency User Agreements currently in use by the agency, perform a technical audit, overseen by the LASO, and review a network diagram. An out-briefing will be conducted, and any violations, potential problems, or recommendations will be identified, followed by a written report sent to the agency head. If an agency is cited with a violation, the agency must respond, in writing, within thirty (30) days identifying corrective measures taken to ensure compliance.

FBI AUDITS

The FBI CJIS Division is authorized to conduct a triennial (once every three years) audit as a minimum to assess agency compliance with applicable statutes, regulations, and policies. Audits may be conducted on a more frequent

basis if the audit reveals that an agency is not in compliance. The FBI CJIS Division shall also have the authority to conduct unannounced security inspections and scheduled audits of Contractor facilities.

FINDER AND ELVIS AUDITS

The Florida Department of Law Enforcement (FDLE) Information Technology Audit and Compliance section has determined FINDER and ELVIS services require an annual user audit certifying all the agency's users are currently employed by the Orlando Police Department. An assigned administrator shall, on a weekly basis, conduct and document review audit logs to identify any possible misuse of the system.

4.13 MEMORANDUMS OF UNDERSTANDING

Any Memorandum of Understanding entered into with the FBI, FDLE, or another Law Enforcement Agency should be reviewed in its entirety by the Police Legal Advisor's officer. The Police Legal Advisor's office shall be the central repository for these agreements.

4.14 VIOLATIONS

Misuse or violations of this policy shall be addressed in accordance with the current issue of Orlando Police Department Policy and Procedure 1604, Discipline, and City Policy and Procedure 808.20 Disciplinary Action unless FDLE chooses to pursue criminal proceedings.

The following are some examples of misuse and would be a violation of the User Agreement with FDLE as well as this policy:

- Use of fingerprint scanner to assist a hospital in identifying an unknown patient who is not otherwise involved in a criminal investigation
- Running a criminal history background check on an individual in preparation for a civil injunction hearing
- Accessing criminal history information for any civil landlord-tenant issue
- Employment verification for non-law enforcement personnel

4.15 DEVICE SECURITY

MCT users shall close the lid of their computer when exiting the vehicle with the computer on to prevent non-CJIS-certified members or citizens from viewing data on their screen.

4.16 CUT, COPY, AND PASTE OF CJIS MATERIAL

An agency must meet the requirements of the FBI CJIS Security Policy prior to cutting and/or copying and pasting from an FCIC/NCIC response (this would include any transaction received from the FCIC message switch) into a local system. Local systems include email, record management systems, jail management systems and any type of electronic storage media that is accessed via a network connection. Members shall not cut and/or copy and paste FCIC/NCIC and CHI responses into City Google email or personal email.

4.17 PERSONALLY OWNED INFORMATION SYSTEMS

Personally owned information systems shall not be authorized to access, process, store or transmit Criminal Justice Information until the Department has established and documented the specific terms and conditions for personally-owned information system usage. When bring-your-own devices (BYOD) are authorized, they shall be controlled using the requirements of an approved Mobile Device Management (MDM) system and of the FDLE CJIS Security policy. Cellular devices are at risk due to a multitude of threats and consequently pose a risk to the Department.

This control does not apply to the use of personally owned information systems that access the City of Orlando information systems and information that is intended for public access (e.g., the City's public website, which contains purely public information).

5. FORMS AND APPENDICES

APPENDIX A-Cloud Solutions

APPENDIX B- CJIS Guidelines
